

Aristolochia westlandii is a species of plant in the family [Aristolochiaceae](#). It is found in [China](#) and [Hong Kong](#), in valley forests in [Guangdong Province](#) at an elevation of 300 to 800 metres (980 to 2,620 ft). The leaves are long, narrow and pointed (12–20 centimetres [4.7–7.9 in]). The flowers are bent tubes from 10–15 centimetres (3.9–5.9 in) long that grow from the base of a leaf. They are yellow with purple veins and blotches.^[2]
